

Alex Whitman

Technology and Information Specialist,
Whitman Transition Advisors -
Profit Team

About Alex

I'm very excited to begin this new chapter of my career with Whitman Transition Advisors. I graduated from Rutgers University with my Bachelor of Arts in Information Technology & Informatics, and continued my studies until Spring of 2023 when I graduated from the Rutgers School of Communication and Information with a Master of Information degree. You might be wondering - Master of Information? Yes! With my degree concentration in Technology, Information & Management, I have a unique skillset of identifying information needs, alleviating technological issues and making our devices work best for us.

After graduating, I started my role as an IT Analyst for the Appellate Division of the State of New Jersey, assisting Judges and Judiciary users with their computers and other tech troubles. I also performed thorough data analytics work, expanding my analytical expertise by leveraging data to resolve information needs and fill in gaps of organizational knowledge. In

this role, I realized that our efficiency with technology can always be improved with a helping hand. I always aim to be the helping hand!

Reach Out If You Need Help With:

- IT Troubleshooting and Tech Support
- Optimizing Technology for Productivity
- Data Analysis and Insights
- Streamlining Workflows With Tech
- Identifying and Resolving Information Gaps
